The «United Chemical Show» International Exhibition is the largest chemical industry exhibition in Central Asia, which covers the entire production cycle: from chemical and polymer raw materials, chemical components, auxiliary materials and equipment to the production of finished chemical products. The exhibition brings together manufacturers of chemical products and services, suppliers of advanced technologies and equipment, as well as consumers from various industries in many countries around the world.

January 28-30, 2026
Astana, Kazakhstan
The International Exhibition Center "EXPO"

\$136 MILLION

INVESTMENTS IN FIXED ASSETS OF THE CHEMICAL INDUSTRY IN JANUARY - MAY 2024

850

OPERATING ENTERPRISES IN THE CHEMICAL INDUSTRY OF THE REPUBLIC OF KAZAKHSTAN

EXHIBITION TOPICS:

CHEMICAL RAW MATERIALS AND AUXILIARY MATERIALS

EQUIPMENT, MACHINES, LABORATORY DEVICES

ADDITIONAL SERVICES

FINISHED PRODUCTS

Industries of Application for Chemical Raw Materials, Equipment, and Technologies:

- Agrochemistry
- Mining Industry and Metallurgy
- Petrochemicals and Fuel & Energy Complex
- Food Industry
- Textile and Light Industry
- Pulp and Paper Industry
- Plastics and Rubber Industry
- Pharmaceuticals and Medicine
- Professional and Household Chemicals

ADVANTAGES OF PARTICIPATION

5 REASONS TO PARTICIPATE IN THE EXHIBITION:

- Increase sales volumes
- Expand the geography of sales
- Find suppliers
- Establish new/ maintain old business contacts
- Learn about new products on the market and global trends

About Us

ChemEngg Research Pvt. Ltd. is a trusted Contract Research and Manufacturing Organization (CRMO). We specialize in delivering end-to-end chemistry solutions, from innovative research to large-scale manufacturing. With a commitment to excellence and a focus on customer satisfaction, we serve diverse industries worldwide by offering tailored solutions that meet their unique chemical and analytical needs.

Specialized Services

1. Contract Research Services and Consultation: Comprehensive chemistry-based R&D solutions.
2. Chemical Analysis Services: Advanced analytical techniques for precise results.
3. Water Testing Services: NABL-accredited testing for reliable quality assurance.

Our Products

1. All salts of Thioglycolic acid-Sodium (Na), Ammonium (NH₄), Potassium (K) & Methyl Derivatives
2. 2-Chloroacetamide
3. Metal Organic Frameworks (MOFs)
4. Protein Hydrolysate
5. Liquid Sulphur

sourcing and materials development to cell technology and battery management systems. Meanwhile, SK Innovation will drive electrolyte additive innovation and explore vanadium recovery from refining processes to enhance cost competitiveness. Together, they aim to deliver differentiated VIB solutions that meet evolving market demands for safety, performance, and value.

This initiative further strengthens SK On's battery chemistry portfolio, which now encompasses nickel-cobalt-manganese (NCM), LFP, and VIB. VIB uses a water-based electrolyte that reduces fire and explosion risks while delivering high power suited for short-duration ESS. Standard Energy's VIB ESS solutions have already demonstrated robust safety in Korea's regulatory sandbox and have been deployed in high-traffic subway stations and buildings without incident. Standard Energy was the world's first to commercialize VIB for ESS applications and has since validated its technology through successful field deployments for

a range of customers. The company was also recognized by TIME magazine as the only Korean firm among the "World's Top Green Tech Companies 2025."

Lee Seok-hee, CEO of SK On, said, "Through this partnership, we will jointly develop ESS vanadium ion batteries with outstanding fire safety, further strengthening our product portfolio. Leveraging our world-class technological competitiveness, SK On will continue to deliver new value to customers."

Kim Bu-gi, CEO of Standard Energy, commented, "By joining forces with SK On and SK Innovation, we aim to accelerate the commercialization of vanadium ion batteries—

complementing lithium-ion battery technology—to set a new safety and performance standard for ESS in environments where both are critical, such as data centers and urban infrastructure."

Korea's second ESS central contract market bidding this year has made fire safety a key evaluation criterion. SK On highlights its advanced early-detection safety technologies for ESS, including electrochemical impedance spectroscopy (EIS), which can identify abnormal signs at least 30 minutes before a thermal event could occur—further strengthening a proactive approach to risk management and prevention.

Arkema starts up its new Rilsan® Clear transparent polyamide unit in Singapore

Arkema (Paris:AKE) is pleased to announce that its new Rilsan® Clear transparent polyamides production unit, located on its Singapore platform, is now fully operational. This milestone strengthens Arkema's leadership in high-performance polymers, giving the Group the largest transparent polyamide production capacity in Asia.

This successful start-up represents a major step forward for Arkema, as the new unit triples the Group's global production capacity of Rilsan® Clear transparent polyamides. This investment of around US\$20 million, announced in July 2025, is part of the

major growth projects in which Arkema has recently invested to support its strategic roadmap on Specialty Materials.

Designed for operational excellence and reliability, this new unit will enable Arkema to meet the growing demand for sustainable high-performance transparent materials across key markets such as eyewear, AR/VR and smart consumer electronics, industrial filtration, healthcare devices and home appliances.

"We are very proud of this strategic expansion dedicated to transparent

polyamides, further strengthening our position as the leading global producer of specialty polyamides", said Laurent Tellier, Senior Vice-President High Performance Polymers and Fluorogases. "It marks the next step in developing our key platform in Singapore, contributing to our strategy to develop local and competitive supply close to our customers in the region."

Rilsan® Clear transparent polyamides deliver a unique combination of high performance, aesthetics and sustainability. They offer lightweight, high transparency, flexibility and chemical resistance, while being fully
